

Faculty: Economics and Political science

Department: Accounting

Division: If applicable

Program Vision

The vision of the department is to provide high quality higher education and scientific research in the field of accounting and auditing. This plays a role in preparing competent researchers and professionals in accounting, and disseminating accounting knowledge, which contributes to providing outputs that help in developing the accounting profession at the local level.

Program Mission

The Accounting Department works to enable graduates of accounting programs (holders of a university degree) to achieve at least a good grade, and to develop themselves in both academic and professional fields. This is in line with achieving human development goals in Libya and providing capabilities and human resources that meet labor market needs.

Program Objectives

- Provided opportunities for holders of a university degree in accounting to complete their postgraduate studies, enabling them to develop their academic and professional capabilities in accounting.
- Qualifying human cadres in the field of accounting that meet the needs of the Libyan labor market, and contribute to solving the problems of society
- Working on developing scientific research in accounting; through the contribution of faculty members in the department and students in scientific conferences and seminars locally and internationally.
- Consolidating cooperation with local, regional and international universities, bodies and scientific institutions in the field of accounting; and activating partnership with distinguished ones in postgraduate programs and scientific research.
